SPRING 2008

HERBALICIOUS!

BY CYNTHIA DAVID
PHOTOGRAPHY BY JAMES TSE

When the recipe calls for a teaspoon of chopped herbs and you've just invested in a pricey bunch, store it wisely. New for spring, this dapper device keeps herbs fragrant and perky for days, even weeks.

Locks in Freshness

Water's key to keeping herbs fresh. Fill the sturdy well half-way, place herbs between the clear panes and snap shut. Click into the well and slip inside the fridge door—how brilliant is that? Replenish or drain water through the clever side port. Comes apart easily for cleaning.
